WHAT IS YOUR DEFINITION OF CLIMATE CHANGE?

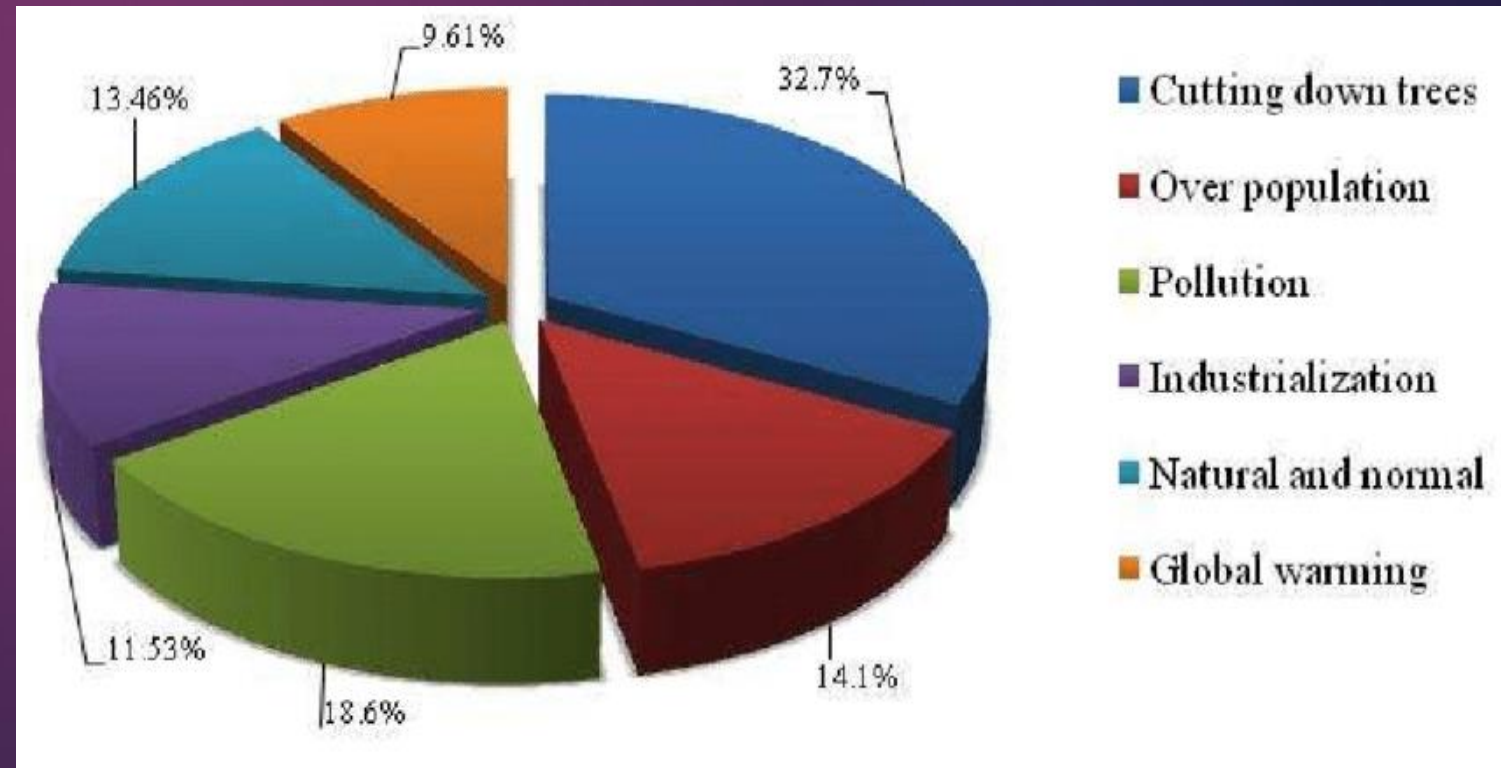

- ▶ Climate change refers to long-term shifts in temperatures and weather patterns. These shifts may be natural, but since the 1800s, human activities have been the main driver of climate change, primarily due to the burning of fossil fuels (like coal, oil, and gas), which produces heat-trapping gases.

WHAT CAUSE CLIMATE CHANGE?

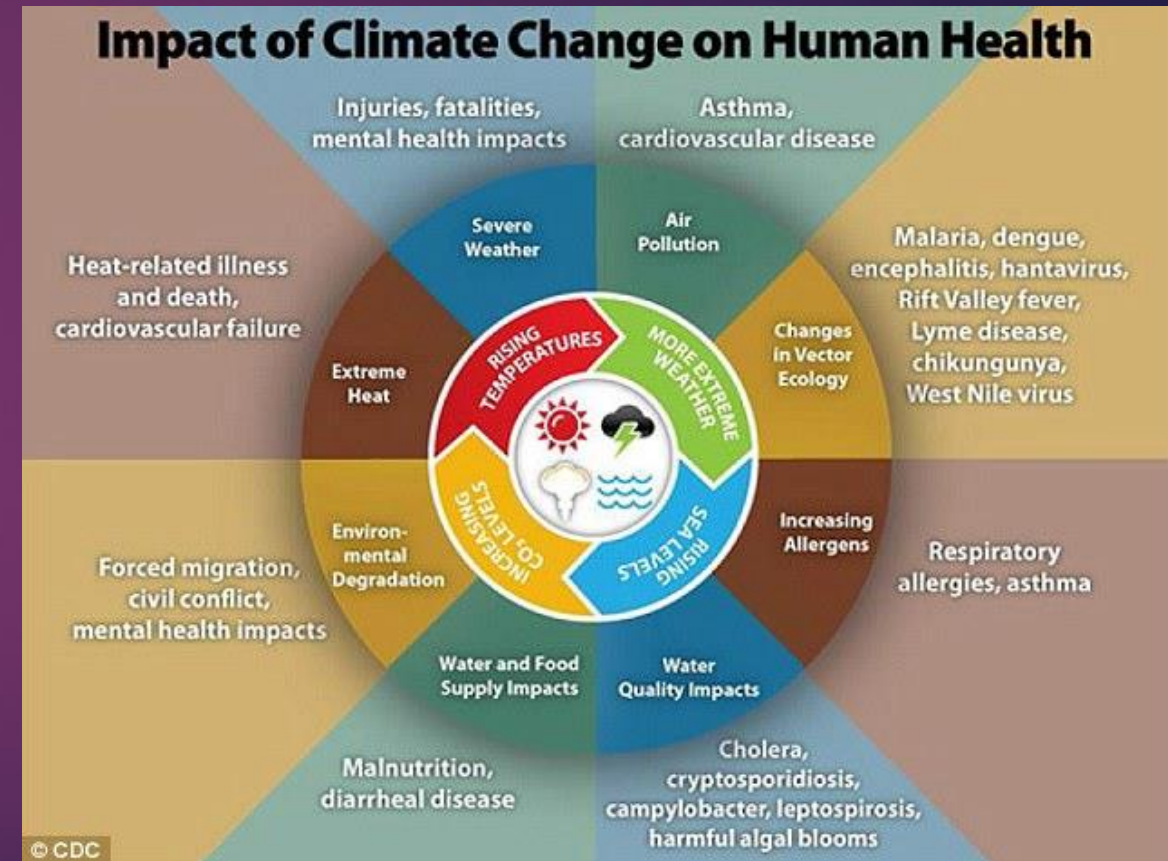

► The National found out the five main culprits for this increase in greenhouse gases.

- Fossil fuels. Expand Autoplay.
- Deforestation.
- Increasing livestock farming.
- Fertilisers containing nitrogen.
- Fluorinated gases.

WHAT IS YOUR PERSONAL CONNECTION TO CLIMATE CHANGE?

Connections with friends and family are key to helping communities adapt to the devastating impact of climate change on their homes and livelihoods, a new study shows. ... The research found people are more empowered to respond when they see others doing the same.

Thank You!

The image features the words "Thank You!" in a highly stylized, 3D font. The word "Thank" is rendered in a gradient of pink, purple, and orange, with a thick black outline. The word "You!" is in a gradient of blue, cyan, and green, also with a thick black outline. The exclamation point is a small green heart. The text is decorated with several yellow starburst shapes that have orange and pink striped patterns on their sides, giving it a celebratory and dynamic appearance.
